

Metagenomics interactive discussion

- Sampling technique, bias
- Metadata
- Ethical background
- Study design
- Metagenomics technique
- Potential batch effect
- Potential future use of samples

Seasonal changes of the nasal microbiome composition in school children

- Sampling technique, bias
- Metadata
- Ethical background
- Study design
- Metagenomics technique
- Potential batch effect
- Potential future use of samples

Tracking microbiome changes during antibiotics treatment in pig farms

- Sampling technique, bias
- Metadata
- Ethical background
- Study design
- Metagenomics technique
- Potential batch effect
- Potential future use of samples

Quantifying the abundance of a virulent *E. coli* strain in sewage water

- Sampling technique, bias
- Metadata
- Ethical background
- Study design
- Metagenomics technique
- Potential batch effect
- Potential future use of samples

Enrichment of bacterial species with high level of antimicrobial resistance in natural water bodies close to pharmaceutical factories

- Sampling technique, bias
- Metadata
- Ethical background
- Study design
- Metagenomics technique
- Potential batch effect
- Potential future use of samples

Microbiome of the vitreous body (in the eye)

- Sampling technique, bias
- Metadata
- Ethical background
- Study design
- Metagenomics technique
- Potential batch effect
- Potential future use of samples
